Amendment Dated: December 29, 2006

Response to Official Action Dated: November 30, 2006

US Serial No. 10/565,892

traversal is based on several points. First of all, this application is based on an International Application in which the International Searching Authority, the European Patent Office determined that the claims to the present composite article and the method of making a composite article did not lack unity of invention (see enclosed copy of the Written Opinion of the International Searching Authority included with the filing of this application). Truly, a product and a process especially adapted for the manufacture of such product is the first of many categories considered acceptable as the type of invention having unity of invention (37 C.F.R. 1.475). Thus, Applicants submit that this issue has already been resolved by the EPO in the International Search Report. On this point, the Examiner is directed to section 1850 of the MPEP where it states "from the preceding paragraphs it is clear that the decision with respect to unity of the invention rests with the International Searching Authority or the International Preliminary Examination Authority". MPEP page 1800-95.

While the Examiner has the authority to request restriction in spite of the IPER under 37 C.F.R.1.499, in this case the Examiner has alleged that Groups I and II do not relate to a single general inventive concept. Applicants specifically traverse because claim 1 recites a composite article having an upper member of plastics material in the lower member of plastics material that together form an outer shell, and an inner core of filler within said shell. Method claim 58 recites a method of manufacturing a composite article comprising the steps

2

US Serial No. 10/565,892

of providing a flowable filler material between upper and lower members that define a cavity

filled with said flowable material, and hardening said filler material to form a solid inner core

in case by said members. Thus, Applicants respectfully submit that claims 41 and 58 do in

fact relate to a single general inventive concept, that being providing a pair or upper members

forming an outer shell and filling an inner core with filler material.

Next, the Examiner basis his restriction on a perceived anticipation by US

6,571,406 to Gerloff. Gerloff is relevant only for disclosing a shower tub, which is the

general form of the product disclosed in the present application. However, even if the issue

of perceived anticipation is appropriate here in the context of a restriction requirement

(which Applicants traverse in that restriction is to be conducted separate of the merits of the

application), Gerloff clearly fails to disclose claim elements cited above in claims 41 and 58.

·Instead, Gerloff discloses a supporting body of a shower tub made of stone or tile. See FIGs.

1 and 2. A frame surrounds a solid non-flowable landing on top and sides. There is no shell

formed by Gerloff. Thus, there is no structure or procedure disclosed in Gerloff which

anticipates the claimed invention.

For all the above reasons, Applicants respectfully traverse the Restriction

Requirement. The Examiner indicates that on October 27, 2006 a telephone call was made to

the undersigned in an attempt to resolve the above restriction, the undersigned respectfully

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/GB2004/003214

_	Box N	o. I Basis of the opinion				
1.	With re	gard to the language , this opinion has been established on the basis of the international application in guage in which it was field, unless otherwise indicated under this item.				
	laı	is opinion has been established on the basis of a translation from the original language into the following aguage—, which is the language of a translation furnished for the purposes of international search and results and 23.1(b)).				
2.		With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:				
	a. type	of material:				
		a sequence listing				
		table(s) related to the sequence listing				
	b. form	at of material:				
		in written format				
		in computer readable form				
	c. time	of filing/furnishing:				
		contained in the international application as filed.				
		filed together with the international application in computer readable form.				
		furnished subsequently to this Authority for the purposes of search.				
3.	ha Co	addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto is been filed or furnished, the required statements that the information in the subsequent or additional pies is identical to that in the application as filed or does not go beyond the application as filed, as propriate, were furnished.

- 2. INDEPENDENT CLAIMS 1 AND 26
- 2.1 The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claim 1 is not new in the sense of Article 33(2) PCT.

 Document D1 discloses (see the corresponding passages cited in the search report):
 - a composite article (cf. fig. 1) having an upper member (1) of plastics material and a lower member (3) of plastics material that together form an outer shell, and an inner core of filler (7) within the shell.

Therefore, the subject-matter of claim 1 is known from D1.

- 2.2 Since the features of the subject-matter of method claim 26 are corresponding to the features of the product as defined in claim 1, this claim neither fulfills the requirements of Article 33(1) PCT.
- 2.3 Besides, the subject-matter of claim 1 and claim 26 is also known from D2, see the corresponding passages cited in the search report.
- 3. DEPENDENT CLAIMS 2-25, 27-40
 Dependent claims 2-25, 27-40 do not contain any features which, in combination

with the features of any claim to which they refer, meet the requirements of the PCT in respect of novelty and/or inventive step (Article 33(2) and (3) PCT), see documents D1-D5 and the corresponding passages cited in the search report.
